

Little And Often Fills The Purse: Learning A Language In The Context Of Relationships

Table 1. Factors related to storytelling, relevant to this case study, with an effect on comprehension

Factor	Key findings relevant to this case study and reference
Input	
Repetition, comprehension checks and gestures	Stories told with these interactional adjustments improve listening comprehension (Peñate Cabrera & Bazo Martínez, 2001)
Length of text	Longer texts make listening comprehension more difficult (Buck, 2001)
Topical knowledge and prelistening activities	Familiar topics and prelistening activities (vocabulary preview, question preview) improve listening comprehension (Buck, 2001; Elkhafafi, 2005; Zeleke, 2013)
Text characteristics	More familiar pronunciation, high-frequency vocabulary and less complex grammar improve listening comprehension (Buck, 2001; Révész & Brunfaut, 2013)
Task	
Reading versus listening	Readers of a text score higher on comprehension than listeners of the same text (Lund, 1991)
Silent reading versus simultaneous listening and reading	Reading while listening provides higher comprehension scores than only reading (Woodall, 2010)
Bi-directional listening versus one-way listening	Bi-directional listening improves comprehension because the listener can use reception strategies and receipt tokens, but the cognitive load is higher and the listener needs to pay attention to non-verbal language (Vandergrift, 2007)
Setting	
Background sound and acoustics	Background noise and bad acoustics make listening comprehension more difficult (Buck, 2001)
Quality of equipment and recording	When listening to recorded sound, poor quality recording and equipment make listening comprehension more difficult (Buck, 2001)
Listener	
Motivation	There are positive relationships between motivation, use of metacognitive strategies and listening success (Vandergrift, 2005)
