

Youth On Trial: A Developmental Perspective On Juvenile Justice

Law/Psychology

In *Youth on Trial*, a wide range of leaders in developmental psychology and law combine their expertise to investigate the limitations of our youth policy—including the problematic trend of trying alleged juvenile criminals as adults.

"It is refreshing to read a publication that is truly original, innovative, and challenging, addressing as it does all aspects and all stages of the impact of the legal process on adolescents. . . . Underlying the papers that make up this excellent book is the assumption that an effective legal response to young offenders cannot ignore the impact of the developmental realities of adolescence on the due process of law."

—Susan Bailey, *Journal of Child Psychology & Psychiatry*

"Grisso and Schwartz have assembled the leading scholars in the field and produced a book that resembles nothing ever before written. . . . This book, in a careful voice, is a measured effort to reintroduce sound public policy back into the juvenile justice discussion."

—Martin Guggenheim, New York University School of Law

"This major contribution to the field of juvenile justice opens a door that has needed opening. . . . Thanks to Grisso, Schwartz, and their colleagues and the MacArthur Network, perhaps there ultimately will be a kinder, gentler nation, at least as far as juvenile offenders are concerned."

—Alan M. Goldstein, *Journal of Psychiatry and Law*

Thomas Grisso is professor of psychiatry (clinical psychology) at the University of Massachusetts Medical School. Robert G. Schwartz is executive director of the Juvenile Law Center in Philadelphia.
