

Peripheral Vision

Understanding Governance: Ten Years On

R. A. W. Rhodes

R. A. W. Rhodes

The paper reassesses the argument in *Understanding Governance* (1997). The first section summarizes where we are now in the study of governance, reviewing briefly the key concepts of policy networks, governance, core executive, hollowing out the state and the differentiated polity. The second section engages with my critics with the aim of opening new directions of research. I concentrate on the key issues of: the context of policy networks, explaining change and the role of ideas, the decline of the state, rescuing the core executive, and steering networks. Under each heading, I sketch a decentred answer to the question of where we go from here. I argue the analysis of governance should focus on beliefs, practices, traditions and dilemmas.

Keywords: core executive, decentred theory, differentiated polity, governance, hollowing out, policy networks

A Personal Introduction

The study of political institutions is central to political science. With political theory, it forms the twin pillars of the discipline (see for example, Rhodes et al. 2006). For those students of political science who specialize in Public Administration, the link to organization studies is even closer. For the young Turks of the 1970s, organizational studies and policy analysis were at the cutting edge of our subfield (see Rhodes 1979). My heroes as a postgraduate and novice were Michel Crozier, Philip Selznick, Herbert Simon and, a choice that is a tad more eccentric, Sir Geoffrey Vickers. In my first job at the Institute of Local Government Studies of the University of Birmingham in the 1970s, contingency theory was flavour of the month and Bob Hinings was the guru (see Ranson et al. 1986). The study of organizations was central to my academic discipline and an integral part of my early career development. The invitation to contribute to the 'Peripheral Vision' section of *Organization Studies* could have induced, therefore, a nostalgic frame of mind. However, any suggestion that the links between political science and organizational studies lie only in history would be misleading (see for example, March and Olsen 2006; Olsen 2005).

My story starts with *Understanding Governance* in 1997, which drew together my long-standing research interests in policy networks and British government (Rhodes 1988; Marsh and Rhodes 1992). However, in drawing this work together I also had to reassess my earlier arguments because the 1980s saw Margaret Thatcher tearing up the post-war consensus on the Keynesian
